SUMMARY

Backend engineer focused on distributed systems and data infrastructure. Comfortable owning services end to end, from design through on-call.

EXPERIENCE

Senior Software Engineer

Corvid Labs | Sep 2019 - Dec 2022

- Led the migration of a monolithic billing service into four bounded services.
- Reduced p99 checkout latency by roughly a third through query and cache work.
- Introduced contract testing between teams, cutting integration regressions.

Software Engineer

Meridian Systems | Jun 2016 - Aug 2019

- Built and maintained the internal job-scheduling platform used by six teams.
- Wrote the ingestion layer for a partner-facing reporting API.

EDUCATION

B.S. Computer Science, Fairmont State University, 2012 - 2016

SKILLS

Python, Go, PostgreSQL, Redis, Kubernetes, Terraform, gRPC
